

Enhance the competence and expertise of all emergency responders through simulation with XVR On Scene

## ADVANTAGES

-  Experience complete freedom to recreate your local situation
-  A wide variety of environments can be filled with country specific 3D objects to create maximum realism and immersion
-  The instructor is always in control of the scenario and learning experience
-  Participants walk, drive, fly and sail around in a simulated reality of an incident
-  Instructors are able to respond to student's decisions on the go, or decide to escalate a scenario during the exercise
-  Training with On Scene means training in a controlled and safe environment
-  You are always able to stop or repeat the training if needed
-  Profit from a global community that shares On Scene scenarios and best practices with each other

## XVR ON SCENE

With the XVR Simulation platform you can teach, train, exercise, assess and evaluate. For Single and Multi-agency purposes, on the bronze, silver and gold level. With all modules the instructor is always in control.

Instructors have years of experience in training incident responders. XVR On Scene is designed as a supporting tool, giving instructors complete freedom to create scenarios according to a specific training objective. XVR On Scene can be used with a great variety of training set ups. From team training and exercising, to classical classroom teaching as well as individual training and assessment.

## WHY XVR ON SCENE?

We believe incident commanders benefit from experiencing incidents in a safe, controllable, repeatable and measurable environment. XVR On Scene is a powerful tool to help trainees understand concepts by experience, let's them acquire practical knowledge in a relatively short timeframe, practice decision making skills and experience situations that rarely occur in real life.

Scenario training in XVR On Scene provides trainees with the opportunity to practice complex incidents, apply protocols and interact in scalable scenarios.

## TRAINING WITH XVR ON SCENE

### Classroom education

The classroom setup is used for triggering a group discussion about a virtual scenario. Discussions can focus on incident approach, carrying out the first reconnaissance or making the first deployment decisions.

### Individual training & assessment

With the individual setup the participant is immersed in a virtual scenario while the instructor can adjust the scenario based on the participants decisions. This setup is excellent for individual training or assessment of a certain skill set.

### Team training

The team setup allows you to train multiple participants in mono- or multidisciplinary exercises. One or more instructors can be in charge of the learning objectives and role-playing. Team training exercises are well suited to train communication and reporting skills.

In XVR On Scene the instructor is always in control. The instructor sets the learning objectives, creates the scenario and guides the trainee through all learning points.

## THE COMMUNITY

The XVR Simulation Platform is being utilized all over the world. The entire platform has been designed to stimulate the sharing of scenarios and custom objects. This way, users from all over the world benefit from each other's knowledge and experience. We value building relationships with our users. Thanks to the enthusiastic and loyal community, the XVR Simulation Platform is constantly being filled with relevant custom content, scenarios and new ways to train your staff.
